

**26.06.2023**  
**10.00-11.30 AM CET**

## **WATER REUSE REGULATION:** **IMPACT ON THE WATER SECTOR**

The Regulation on minimum requirements for water reuse for agricultural irrigation entered into force in June 2020.

The new rules will apply from 26 June 2023 and are expected to encourage and facilitate water reuse in the EU. This text covers not only the water reuse in agriculture, but allows EU member states to use reclaimed water for further uses such as industrial water reuse and amenity-related and environmental purposes.

On this occasion, the **European Water Association** is organising a Webinar on Water Reuse that will provide the participants with a **“general introduction on water reuse and overview of the current legislation in Europe”**.

It will also be platform to exchange on the impact of this regulation on the water actors. The speakers will present a **“General approach for the implementation of water reuse”**, share the **“Overcoming barriers to further implementing water reuse in Europe”**. Águas do Tejo Atlântico will present their **plan towards water reuse and circular economy pathway**.

All presentations will be followed by a discussion open to the participants.

### **Program :**

**Prof. Jiri Wanner**

University of Chemistry and  
Technology Prague

The EU Water Reuse Regulation:

- General introduction
- European Overview

**Prof. Dr.-Ing. Jens Haberkamp**

FH Münster – University of Applied Sciences

**IMPACT ON WATER ACTORS:**

- General approach for implementing water reuse projects

**Prof. Dr.-Ing. Jörg E. Drewes**

Chair of Urban Water Systems Engineering -  
Technical University of Munich

- Overcoming barriers to further implementing water reuse in Europe

**Paulo Inocêncio**

Águas do Tejo Atlântico

- Águas do Tejo Atlântico plan towards water reuse and circular economy pathway
